

**Wifi report setup manual for  
CraftBot 3D printers**

1.) In the settings menu, press the  icon to get to the reporting menu. This feature works only on printers with WIFI panel. Please make sure the WiFi is connected. Please enter the serial number of the printer here and reporting must be accepted. Please find the serial number on the back of the printer.

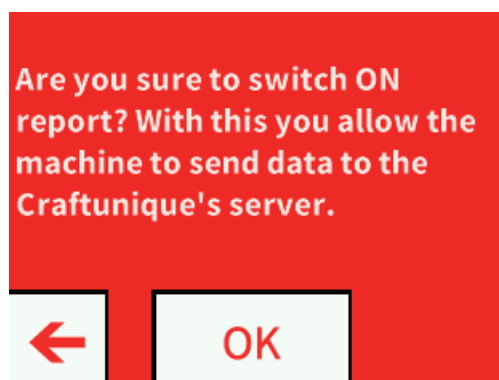

1.1. Report menu

2.) Serial number settings. Please enter the printer's serial number to the respective window.

1.2. Serial number settings.

3.) Reporting acceptance. After switching the printer on, the text of 'report state : ON' will be displayed.

1.3. Accept reporting

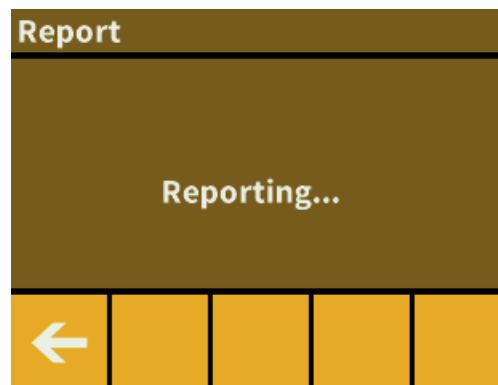

4.) In the report menu click on the third icon to see if this function works correctly. The gray icon may indicate that the printer is not connected to the network or the reporting is failed. If data was sent successfully the text of 'Report is successful!' message appears on the display.

In case of an error, you will see the following notifications:

Incorrect serial number! - The serial number is not correct (not found in database)

Server database error! - The server has a problem.

DNS fail! - Internet connection error.

1.4. Reporting

5.) After logging on, you can register your printer at: <https://craftunique.com/my-account/machines>.

Here you can filter between time intervals data. You can see the number of working hours between each report and the length of filament used.

The data can be saved by the user in \*.pdf format.

6.) The printer sends the daily report automatically at midnight or at the first time when the printer is switched on during the day. If switched off or the WiFi is not connected, the printer does not send daily report.
